Strasburger Believes District Should Prohibit Hanging Signs.

ASKS CHAMBER TO ACT

That the stretching of political and other banners across streets serves to both mar the beauty of the city and endanger the lives of persons passing slong such theroughfares was the spinion expressed by Joseph directors as a meeting last night of the board of directors of the Chamber of Commerce, of which he is a member.

"I believe we should go on record as disappreving of this practice, and that we should request the Commissioners to prohibit the stretching of such banners in the future," said Mr. Strasburger.

"That the banners mar the beauty of the city is generally agreed. They are also a memace to both life and property. Only last night a political banner bise down and broke the platinglass windows on a merchant's establishment. Had this banner fallen upon a passing pedestrian there is no doubt that serious injury would have resulted. The banners also serve to frighten horses and cause them to run away."

A committee of three was authoria to givestigate the plan of the Richme Chamber of Commerce to building a Richmend to Washington section of a proposed Guebec to Mianti internation lighway. President Oyster was auth highway. President Cyster was authorized to appoint three delegates to the meeting of the Persian-American Educational Society in this city April is to 20. John Duigh, chairman of the apecial committee to investigate printing conditions, reported it is the sense of the cumulities that all Washington merchants should be urgee to give heaf printing stabilishments a chance to bid on their work. TARIFF BOARD IS DEFENDED BY TAFT

Address to Cotton Manufacturers.

Several hundred delegates to the an-mual convention of the American Cotton Manufacturers' Association at the New Raisigh were received yesterday after-noon in the Zast Room of the White House by President Taft, who addressed them briefly upon the tariff question. "We are in this country in respect to verry business on

them briefly upon the tariff question.

"We are in this country in respect to every business on a protective tariff basis," Mr. Tarif said. "It do not mean that every husiness needs a protective tariff to enable a many businesses that are dependent on a protective tariff, that they may live, that to take away a protective tariff from them would disturb the whole business foundation of the country. Therefore it is assential that when we who are charged with authority as to the adoption of laws, and the formation of tariff bills attempt to smeet them, we should know that we are touching the business of the country. "It is not right that we should treat the industries of this country without an intimate knowledge derived from expect formation as to what the effect of those laws will be which we propose to pass revising the lariff, which as much affect the business and the business preserved in a country." "Now I am making that argument in favor of a tariff board composed of experts who will give everybody an opportunity to be heard and then will make up its mind as an independent quantitation.
